EDUCATION

IPS Academy, Indore

Bachelor of Technology in Computer Science

Minors: Data Science

Relevant Coursework

- Data Structures & Algorithms, Machine Learning, Artificial Intelligence, Operating Systems, Computer Networks

SKILLS

Programming Python, C/C++, JavaScript, Java, SQL, R, PHP

Frameworks Django, Flask, Pandas, NumPy, TensorFlow, OpenCV, Streamlit

Technologies AWS, Git/GitHub, Linux, UNIX, REST APIs, Data Science, Automation, Machine Learning

Tools Docker, Tableau, Selenium, Chart.js

EXPERIENCE

ASAP Research Solutions

Dec 2023 - Jun 2024

Software Development Engineering Intern

- Engineered a data accuracy-enhancing system, reducing data redundancy by 25% using Python, Pandas, NumPy, and ML models.
- Optimized web applications using Python, Java, and JavaScript, improving code efficiency by 15% and reducing API response time by 20%.
- Constructed and maintained scalable back-end solutions using Flask / Django, integrated SQL / NoSQL databases, and deployed REST APIs, leading to a 30% increase in user engagement.

Chirayu Jain Architects

Nov 2023 - Jan 2024

Research & Development Intern

- Planned and developed 50+ high-impact architectural models, improving project efficiency by 20%
- Leveraged Python, Pandas, and Tableau to clean, analyze, and visualize complex datasets, generating actionable dashboards and reports that improved data-driven decision-making

National Cadet Corps (NCC)

Aug 2022

Senior Under Officer

- Led and mentored 600+ cadets during All India Thal Sainik Camp, overseeing training, logistics, and operations.
- Improved cadet performance and morale through strategic leadership and effective team-building exercises.

PROJECTS

Skill Sarthi - AI-Powered Skill Learning Dashboard

Jun 2024 - Nov 2024

- Pioneered an AI-driven personalized education platform, integrating a career guidance system that offers tailored advice; achieved a user satisfaction rating of 4.8 out of 5 based on user feedback surveys and provides real-time career guidance
- Architected a responsive user interface with React.js, Next.js, and TypeScript that served 5,000+ daily active users, achieving a 99.9% uptime and reducing page load times by 40% Node.js & Express.js for backend services
- Implemented real-time collaboration and skill gap analysis using data visualization tools like Chart.js

Indian Sign Language Detection & Translation Mode

Jan 2024 - Apr 2024

- Designed a real-time AI model translating Indian Sign Language into words with 95% accuracy
- Trained on a dataset of 1000+ gestures, processing signs in under 200ms using TensorFlow, OpenCV, and NumPy

ACHIEVEMENTS & LEADERSHIP

- Solved 200+ DSA problems on Leetcode, specializing in Arrays, Graphs, DP, and Trees
- Architected a modular and scalable open-source application using modern software design principles; the tool is now used by over 300 students across local university clubs
- Conceptualized and curated content for TEDx IPSA Indore, recruiting 10 speakers and resulting in 500+ attendees and positive feedback that cited content relevance as 'very insightful'

CERTIFICATIONS

- AWS Cloud Practitioner (2024)
- Getting started with jetson Nano AI (2024)
